DETAILED ACTION

Allowable Subject Matter

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's invention is continuing to transmit data on one channel while scanning additional RF channels to detect whether a packet is currently being transmitted. This occurs upon receipt of a scan channel request, which triggers the scanning of other RF channels and does not impede the transmission of the packet on the first channel. This is not taught or suggested by the cited prior art.
3. The device claims of claims 14-23 and the module claims of claims 24-32 all possess memory which stores information. The device claims and module claims all hop between radio frequencies. These both indicate physical transformations which are statutory, and cannot be read as software *per se* by one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Chevillat et al. US 6,181,683
6. Moura et al. US 5,818,845
